Foreword

It is a privilege and joy to introduce "India's Web3 Revolution: A Compendium of Web3 Firms Led by Indian Innovators," a pivotal report that maps the expansive terrain of India's diverse Web3 landscape. As Secretary, Ministry of Electronics and Information Technology (MeitY), I have witnessed firsthand the wide range of technological innovations that have taken place in the country over the recent years, with blockchain tech and Web3 in particular being a key element in these developments.

Today, India as a hub of tech talent and holds the potential to lead the world in emerging technologies. The zeal of our entrepreneurs, developers, and technologists has managed to transform the country from a mere spectator to an active contributor to the new digital age.

This compendium is a testament to the immense tech talent within the country, showcasing over 400 Indian companies that are leading the charge in the realms of Blockchain Infrastructure, Non-fungible Tokens (NFTs), the Metaverse, and Decentralized Autonomous Organizations (DAOs).

At MeitY, we are committed to nurturing a Web3 ecosystem that is conducive to technological advancement while ensuring robust digital governance. This can be seen in our initiatives such as the release of the National Strategy on Blockchain in 2021 and the establishment of a Centre of Entrepreneurship (COE) in Blockchain Technology to identify and evaluate promising start-ups in the field of Blockchain Technology. Our policies and initiatives aim to empower innovators and entrepreneurs, providing them with the tools necessary to explore and expand new frontiers. The rise of Web3 technologies provides us with the opportunity to develop use cases that serve the public good through enhanced transparency while offering us a unique opportunity to foster a more inclusive digital economy.

As readers delve into the report, I hope they gain a deeper understanding of the sheer diversity and dynamic nature of India's thriving Web3 ecosystem. Together, I believe Indian innovators hold the know-how to not just navigate this emerging space but the capability to lead it.

Foreword

Dilip Chenoy

Chairperson - Bharat Web3 Association

India's Web3 Revolution: A Compendium of Web3 Firms Led by Indian Innovators

As the Chairman of the Bharat Web3 Association, it is with immense pride and a profound sense of optimism that I present to you our comprehensive report, "India's Web3 Revolution: A Compendium of Web3 Firms Led by Indian Innovators." The report is a significant step in our efforts to showcase the vast number of firms working within the Web3 sector in India, as well as the remarkable diversity and innovation present within it.

India stands at the cusp of a digital revolution, and the Web3 revolution promises to redefine the contours of our economy, governance, and overall society. The advent of Web3, characterized by its decentralized, transparent, and user-centric approach has opened up unprecedented opportunities for growth, inclusivity, and empowerment. Through this report, we aim to illuminate the path for policymakers, entrepreneurs, investors, and enthusiasts, providing a detailed overview of the hundreds of companies operating in the domestic Web3 space.

The inclusion of more than 400 Web3 firms in this compendium is a testament to the vibrant entrepreneurial spirit and innovative prowess of Indian Innovators. From decentralized finance (DeFi) to Blockchain infrastructure and services, and tokens (including non-fungible tokens (NFTs), Metaverse to decentralized autonomous organizations (DAOs) and Custody Wallets, Indian firms are at the forefront of pioneering applications and services leveraging Web3 technologies. This diversity not only underscores the versatility of Web3 but also highlights the myriad ways in which it can contribute to our digital economy and societal advancement.

As we release this report, our aim is not only to showcase the scope of the Web3 sector in India, but also to inspire further innovation, collaboration, and growth within this growing segment. The Bharat Web3 Association remains committed to fostering a conducive environment for Web3 to flourish, advocating for supportive policies, facilitating knowledge exchange, and nurturing a community of pioneers to help unlock the full potential of Web3 and pave the way for India to emerge as a global leader in the digital era.

1. Introduction to Web3

Web3, characterised by the concepts of blockchain, decentralization and smart contracts has today become an inalienable part of the global digital revolution and transformed how users interact with the internet. Like with each iteration of the web before it, Web3 brings a paradigm shift in the way we interact with technology and data, with an increased focus on security, enhancing user privacy and transparency. Unlike Web1, where users were only able to read data shared by certain companies or Web2, where users could post and create content over the Web, but on platforms mainly owned by big, centralized entities, Web3 aims to create a more open and democratic web, where data and assets are controlled by individuals rather than centralized corporations.

This shift promises to redefine the digital landscape, fostering an environment where power is distributed among its users rather than concentrated in the hands of a few tech giants. This is the reason why Web3 is often referred to as the next iteration of the internet.

Concepts of Web3 such as Decentralised Finance (DeFi), Non-Fungible Tokens (NFTs), Decentralised Apps (DApps), and Decentralised Autonomous Organisations (DAOs) open up an immense number of potential use cases that can provide solutions to real-world problems. This includes redefining various sectors from finance and entertainment to governance and beyond, enabling a more transparent, secure, and efficient digital ecosystem.

However, despite its potential, Web3 is not without its challenges. These include challenges related to a general lack of awareness of Web3, and global regulatory uncertainty, which require attention to ensure its widespread adoption. Nonetheless, the promise of a more equitable, secure, and decentralized internet continues to drive innovation and interest in the Web3 space.

As we stand on the brink of this new digital era, it's clear that Web3 has the potential to fundamentally alter how we interact with the online world. By prioritizing user sovereignty, decentralization, and interoperability, Web3 not only offers a vision for a new internet but also lays the groundwork for a more inclusive and democratized digital future.

1.1 Use Cases and Applications

The versatility of Web3's application is evident across multiple domains, showcasing its potential to revolutionize how we interact with digital services, manage assets, and participate in virtual communities. This breadth of application stems from the foundational technologies of Web3, including blockchain, smart contracts, and decentralized networks, which together enable a wide array of use cases beyond traditional financial transactions.

Applications of Web3 are diverse with several use cases related to digital identity and ownership where users can securely maintain ownership of digital identities, and leverage the metaverse to create immersive, interconnected virtual experiences for consumers. In the finance sector, decentralized finance (DeFi) platforms are challenging traditional banking by offering services like lending, borrowing, and trading without the need for intermediaries, helping to bridge the credit gap and provide inclusive access to financial services, while non-fungible tokens (NFTs) are revolutionizing the art and entertainment industry providing a mechanism for digital ownership and monetization of content. In the realm of governance, Web3 technologies offer the possibility for more transparent and participatory decision-making processes.

The applications of Web3 in the Indian context are as diverse as they are transformative, offering opportunities to address unique challenges and leverage the country's rapidly growing digital infrastructure. From financial inclusion and artist empowerment to transparent governance and education and healthcare data security, Web3's decentralized technologies hold the promise of fostering a more inclusive, and efficient system, aligning with the government's vision of digital India.

Thus, Web3's versatility showcases its potential to disrupt traditional business models, democratize access to services, and empower users with greater control and ownership over their digital lives.

As the technology matures and adoption grows, we can expect to see even more innovative applications that leverage the unique benefits of Web3.

1.2 Global Potential of Web3

Globally, Web3 and Metaverse are expected to contribute around 8% of the $160 trillion global GDP by 2030, with the market size for segments such as NFTs being valued at $21 billion in 2022 and $212 billion by 2030, growing at a CAGR of 34%. Asset Tokenization, another revolutionary concept that has the potential to reshape the way we perceive and interact with traditional assets in this digital age, and which can improve accessibility through fractional ownership, and lower investment minimums is also expected to take off globally with the global valuation of tokenised assets expected to reach somewhere between $5 trillion and $16 trillion by 2030.

Further, metaverse-related projects like Decentraland were valued as high as $1.2 billion as late as October 2022 - with Samsung, Adidas, and PWC having purchased digital properties. The global influence of Web3 can also be gauged from the fact that as of June 2023, there were over 21,000 developers active monthly worldwide, which has increased by 92% since June 2020, with blockchain-related developer jobs being some of the most well-paid jobs globally.
The economic potential of Web3, combined with its transformative potential in a vast array of sectors makes it a compelling vision for the future of the Internet, promising a more open, inclusive, and decentralized digital landscape on a global scale.

2. Web3 in India

India, with its vast population, a burgeoning tech sector, and increasing internet penetration, stands at the cusp of a significant opportunity with Web3. The country's vibrant startup ecosystem is home to more than 1,000 Web3 start-ups, making it one of the largest ecosystems in the world. The country also accounts for 12% of the world's Web3 developers in 2023, positioning India as a key player in the global Web3 landscape. The rapid growth of this ecosystem is also evidenced by India leading the world in grassroots crypto adoption according to Chainalysis's Global Crypto Adoption Index and emerging as the top adopter of DeFi technologies as per the 2023 DeFi Technology Adoption Index.

India, by leveraging the potential of blockchain technology, stands to capitalize on the time an Indian consumer spends online. With blockchain technology, consumers can own a stake in the digital platforms they use frequently, allowing them to capture some of the value they contribute. This could be instrumental as India's digital economy is projected to grow to $1 trillion in the next few years. If Indian consumers could own even 10-20% of this value, it would represent a significant shift, propelling the country forward. VDAs and blockchain are seen as central to unlocking these opportunities, suggesting a future where India not only thrives in digital engagement but also in ownership and economic gains.

While Web1 and Web2 were dominated by Western companies, Web3 presents an unparalleled opportunity for India to take a leading role in this new phase of the Internet. This transition has the potential to redefine India's position in the global digital economy, shifting its role from primarily being a talent exporter to becoming a hub for product innovation and technological leadership. Embracing Web3 can empower India to leverage its vast pool of skilled professionals and innovative startups to create cutting-edge products and services, establishing the country as a product-driven powerhouse on the global stage.

Indian startups have been at the forefront of exploring the vast potential of Web3 across various sectors. From DeFi platforms to NFT Marketplaces, domestic start-ups are exploring Web3 use cases in supply chain management, finance, art, gaming, data records, etc.

This exploration is not only demonstrating the versatility and potential of Web3 technologies but also positioning Indian startups as key players in shaping the future landscape of the internet. By

capitalizing on Web3's capabilities, these startups are paving the way for transformative solutions that promise to redefine industry standards and user experiences globally.

3. Compendium of Web3 Firms led by Indian Innovators

Recognizing the rich diversity within the Web3 sector and its potential impact on India's digital future, the report aims to provide a comprehensive overview of the hundreds of start-ups operating in this space, working in segments such as DeFi, Blockchain Solutions and Infrastructure, Asset Tokenization, Metaverse, Gaming, Media, and Web3 Advisory Services among others.

For the purpose of the compendium, we have included not just those startups and companies operating in the domestic Web3 space but also those led by Indian innovators across the world. This emphasizes India's significant global impact and showcases how Indian Innovators are driving the development of Web3 technologies across the globe.

3.1 Research Methodology

Our research covered firms across various segments of the Web3 landscape, including DeFi, NFTs, blockchain infrastructure and services, metaverse applications, among others. The focus of the research report has specifically been on firms led by Indian innovators or headquartered in India.

Data collection for the report involved utilizing Primary as well as Secondary methods of collecting data:

Primary Data: Our analysis included conducting surveys with founders of domestic Web3 start-ups, as well as interviews with CEOs, and other key personnel of Web3 firms located in the country.

Secondary Data: An analysis of secondary data included a review of company websites, industry reports, and relevant databases to extract data on company background, Investors and funding.

3.2 Our Analysis

- Our analysis of 421 companies in the Compendium reveals that nearly 70%, or 289 companies, are headquartered in India.

- Within the country, Karnataka stands out as a hub for Web3, with 97 companies based in the state, making it the leading region, followed by Maharashtra as the second most popular destination for Web3 start-ups with 47 companies headquartered in the state. Telangana with 20, Haryana with 19 and Uttar Pradesh with 16 companies round up the top 5 states for Web3 start-ups in the country.

- In terms of cities, Bengaluru continues to hold its title as the Tech Capital of India, hosting 96 companies. Mumbai is the second preferred city for Web3 startups, home to 37 companies. New Delhi ranks third with 26 companies, while Hyderabad and Gurugram complete the top five, hosting 20 and 16 startups respectively.

- Further, Blockchain Services/Solutions has emerged as the Web3 vertical with the highest concentration of companies operating within it, with 79 companies engaged in developing Blockchain-related solutions for various industries. This is followed by VDA Exchanges and Trading Platforms and Blockchain infrastructure companies which occupy the second and third positions with 42 and 36, respectively. Decentralized Finance and Gaming & Entertainment complete the top 5 verticals within the Web3 sector with 28 and 25 companies respectively

Through this report, we hope to quantify and bring attention to the start-ups contributing to the Web3 revolution in India, while also serving as a valuable resource for investors, entrepreneurs, as well as policymakers wanting to know more about the potential of Web3 in India.

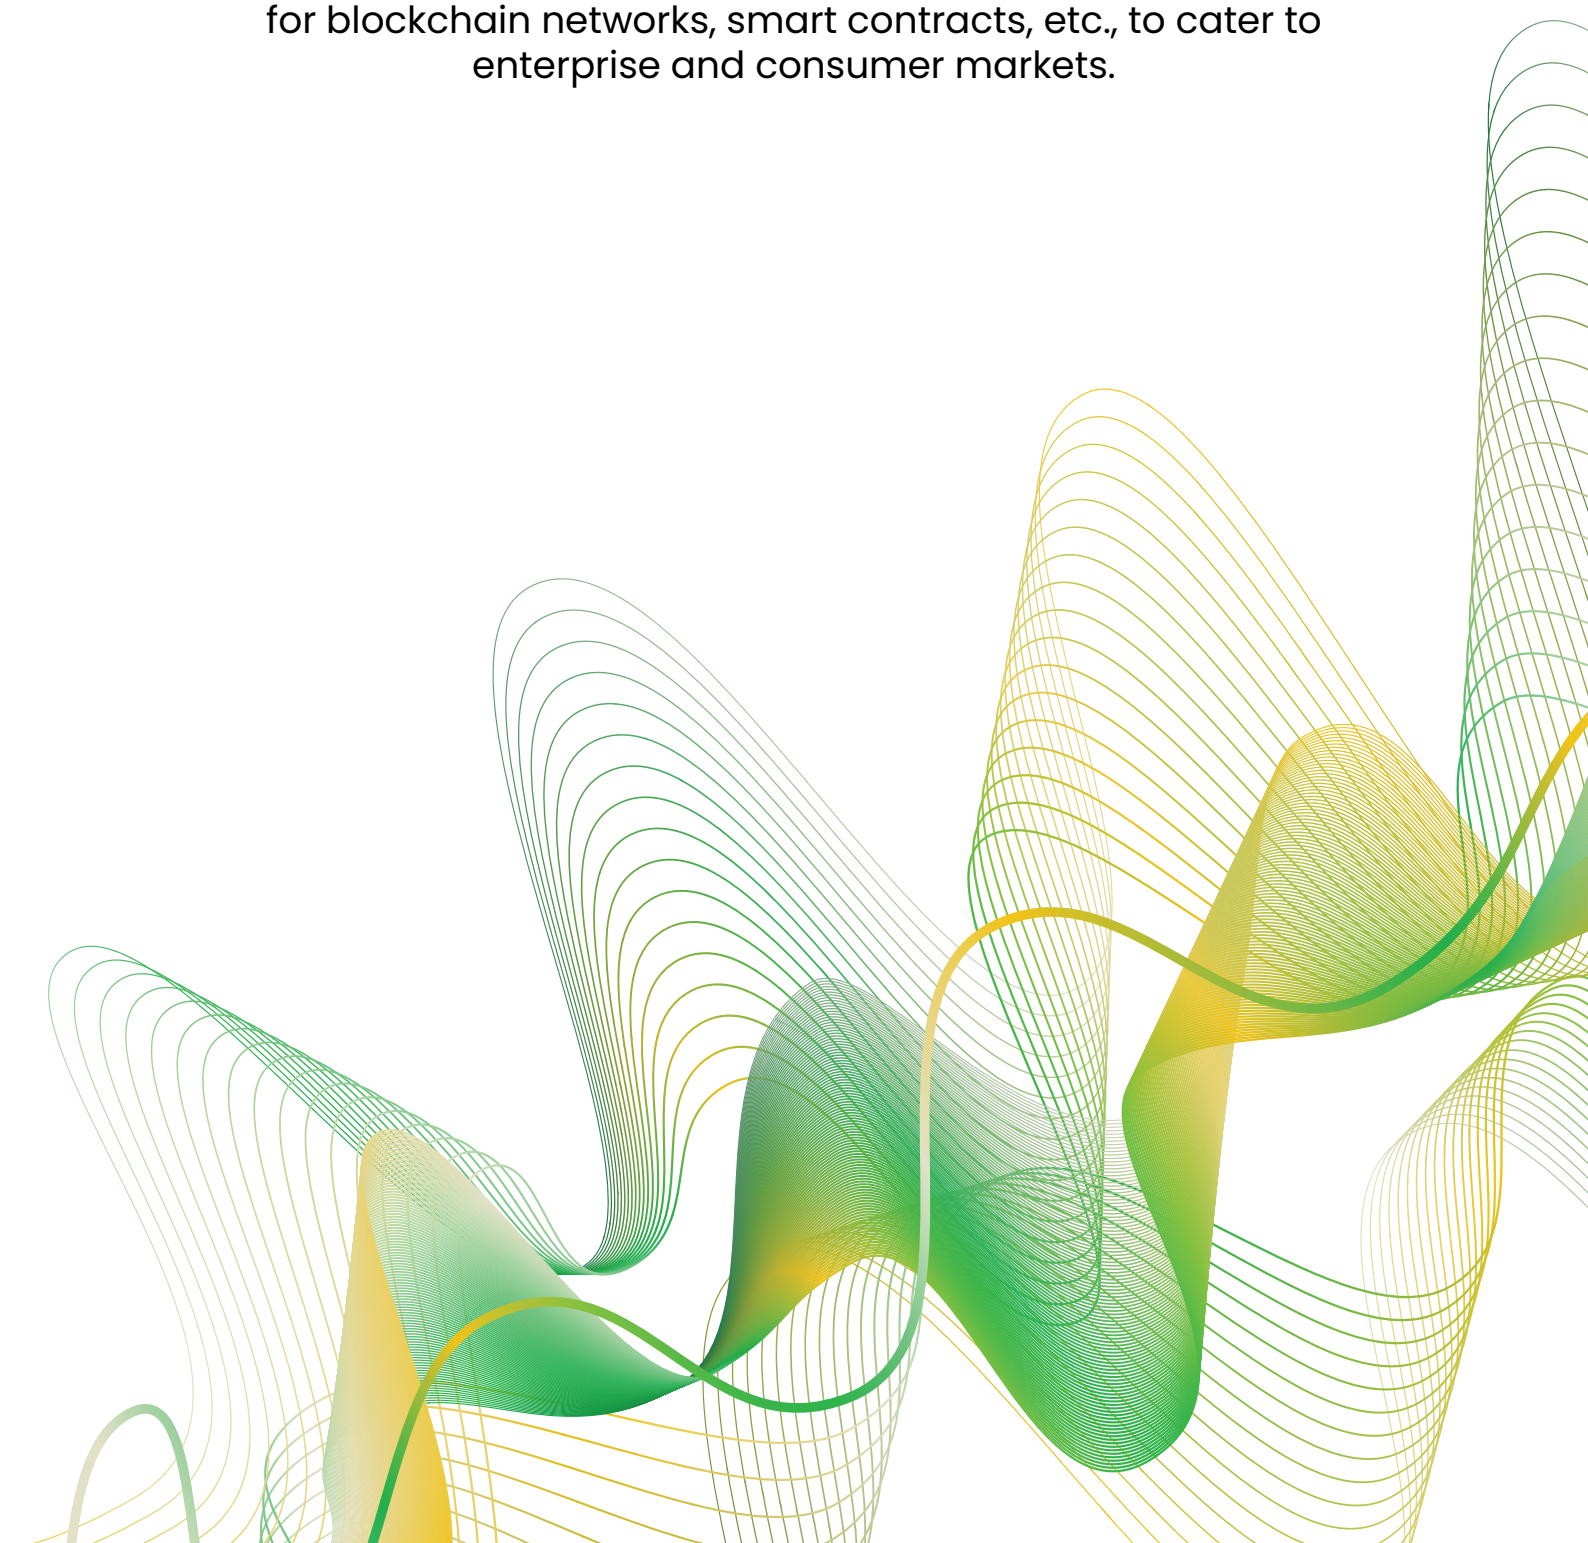
Blockchain Infrastructure

They develop the foundational technology and framework for blockchain networks, smart contracts, etc., to cater to enterprise and consumer markets.



Polygon Labs

Industry Vertical	Blockchain Scaling Infrastructure
Founder(s)/CEO	Sandeep Nailwal, Jaynti Kanani, Anurag Arjun, Mihailo Bjelic
Date of Establishment	2017
HQ	Remote

Website
https://polygon.technology

LinkedIn
https://www.linkedin.com/company/polygonlabs/

Company Background and Business Model :

Polygon Labs is an international software development company, which builds blockchain scaling infrastructure, that is, software that makes blockchain networks, including and especially Ethereum, run more quickly, efficiently and cheaply. The predecessor to Polygon Labs was founded in India. The most well known piece of software created by Polygon Labs is the Polygon network, a proof-of-stake network on which countless third party software developers and businesses have built innovative applications in all areas, including social networking, art and NFTs, consumer rewards, and traditional and decentralised finance, among others.

Key Investors and Funding Raised :

2 Seed / 2 Late-Stage Total funding of $451M over 4 rounds.

CinemaKoin

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Shabbir Boxwala
Date of Establishment	21-Oct-22
HQ	Bengaluru, Karnataka, India

Website
https://www.cinemakoin.io/

LinkedIn
https://www.linkedin.com/company/cinemakoin/

Company Background and Business Model :

CinemaKoin is a web3 conglomerate project focused on developing a one-stop solution catering to Crypto trading, NFTs, Metaverse and Blockchain needs. They are building an entire ecosystem consisting of CinemaKoin, the crypto asset; C- Swap, the decentralized exchange; Cine-Marketplace, the decentralized NFT marketplace; Cinemaverse, its metaverse; and Cinemachain, its blockchain.

Key Investors and Funding Raised :

Witness Chain

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Pramod Vishwanath, Himanshu Tyagi, Ranvir Rana
Date of Establishment	2022
HQ	Bengaluru, Karnataka, India

Website
www.witnesschain.com

LinkedIn
https://www.linkedin.com/company/witness-chain/

Company Background and Business Model :

Witness Chain is blockchain company based out of Bengaluru, India and Princeton, USA, building a Proofs of Bandwidth system for Trustfree Networking. Witness Chain is a proof system for decentralized networks such as Helium. It provides proofs (or witnesses) of network performance, which are like decentralized speed tests or ping tests that work without requiring trusted servers and devices. It facilitates trustfree networking where any device with any radio can offer network to any user or enterprise.

Key Investors and Funding Raised :

Early stage VC. Investors include Polychain Capital, dao5, Frontiers Capital, Robot Ventures and Ethereal Ventures

AlgoBharat

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Anil Kakani (India Country Head)
Date of Establishment	2023
HQ	New Delhi, Delhi, India

Website
https://algobharat.in/

LinkedIn
https://www.linkedin.com/company/algorandbharat/

Company Background and Business Model :

Algorand is a decentralized blockchain platform operational globally. Its unique combination of global scalability, high performance and ironclad cryptographic security makes it a platform developers can confidently build on for today and for the future. The scalability of transactions per second and cost per transaction make Algorand's blockchain protocol the best fit for large scale adoption.
Algo Bharat has partnered with the Algorand Foundation to promote the organic diffusion of Algorand in India. Algo Bharat maintains that India is home to some of the world's best developers and is dedicated to expanding the understanding of Web 3 and its importance in developing dApps to address some of the most pressing challenges.

Key Investors and Funding Raised :

-

Dojima Network

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Akhil Reddy, Bhagath Reddy
Date of Establishment	2021
HQ	Bengaluru, Karnataka, India

Website
www.dojima.network/

LinkedIn
https://www.linkedin.com/company/dojimanetwork/

Company Background and Business Model :

Dojima network is a blockchain technology company which develops a cross-chain interoperability blockchain that allows of transferring tokens in between layer1, layer2 chains. It provides infrastructure to develop applications on dojima which facilitates to talk layer1, layer2 chains in a to and fro manner from single place. Dojima also provides cross-chain wallet to manage multiple blockchain tokens at one place and allows send, receive tokens. Currently, supported blockchains are Dojima, Ethereum, Solana, Polkadot, Arweave, Binance.

Key Investors and Funding Raised :

$1M, Seed funding

GPU.net

Industry Vertical	Decentralized Graphics Processing Unit
Founder(s)/CEO	Suraj Chawla
Date of Establishment	1-Oct-23
HQ	New Delhi, Delhi, India

Website
https://www.gpu.net/

LinkedIn
https://www.linkedin.com/company/gpunet/

Company Background and Business Model :

The GPU Network is a decentralized graphics processing unit on demand infrastructure that powers the next generation of Generative AI, Web3 Metaverses, High-end graphics rendering and VDA mining. The GPU Network project aims to tackle the current surging demand for GPU resources across the globe by leveraging blockchains core decentralized nature. GPU.Net is on a mission to create a distributed network of GPUs that would empower an efficient, accessible and cost efficient GPU resource sharing ecosystem. It would foster advanced computations such as Training AI/ML Language models, Complex gaming, Scientific computing etc on a large scale.

Key Investors and Funding Raised :

Seed $500K Investment From Momentum 6 & Alphablockz

Grow Digi India

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Sachin Kumar (Managing Director) Dhanraj Dadhich (CTO) Vijay Kumar (COO)
Date of Establishment	12-Jan-21
HQ	Noida, Uttar Pradesh, India

Website
www.jumbochain.org

LinkedIn
https://www.linkedin.com/company/jumboblockchain/

Company Background and Business Model :

Grow Digi India Ltd. is on a mission to develop a sustainable Layer 1 blockchain. Its flagship innovation, Jumbo Blockchain, distinguishes itself as a unique Layer 1 chain. It's engineered to address the pivotal challenges in technology today: speed, security, and cost efficiency. What sets Jumbo Blockchain apart is its groundbreaking approach to utilizing fractionalized real-world assets as native tokens – a stark contrast to conventional blockchain models.
Grow Digi has made significant strides in blockchain technology, evidenced by their filing of three patents. These patents encompass the Jumbo consensus mechanism and the Jumbo Sharding Protocol, enhancing transaction mechanisms.
Their business strategy is multifaceted, encompassing strategic alliances, a 'build to earn' model, and offering Blockchain as a Service (BaaS).

Key Investors and Funding Raised :

Friends & Family, Total funding (USD 500K)

Maa Laxmi Concept Solutions

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Hemant Kasera (MD)
Date of Establishment	1-Aug-23
HQ	Raipur, Chhattisgarh, India

Website
https://www.maalaxmi.ai/

LinkedIn
NA

Company Background and Business Model :

Maa Laxmi was established with the objective of preserving and promoting Indian Culture through blockchain technology. Their vision is to create a platform that not only provides financial opportunities but also acts as a gateway to spiritual enlightenment. The company is developing Blockchain, Maa Laxmi Crypto Coin and Kuber Ji wallet along with a platform to create/ develop NFTs through their ecosystem. The basic idea of launching the Laxmi-M crypto coin is to connect with the people around the globe and promote Indian culture, spirituality and religious practices with the help of digital wallet and Laxmi-M crypto coin.

Key Investors and Funding Raised :

Early Traction

Cypher Blockchain

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Vinod Kumar, Haneef Khan
Date of Establishment	2022
HQ	New Delhi, Delhi, India

Website
https://cypherchain.org/

LinkedIn
https://www.linkedin.com/company/cypherchain/

Company Background and Business Model :

Cypher Blockchain is set to be a dedicated consensus platform aimed at supporting the development of future "AAA" level games. It will serve as a bridge between blockchain developers and game developers, ensuring the provision of high-end quality game development within the blockchain ecosystem. Utilizing Cypher chain SDKs and various other resources available to them, Cypher Blockchain will support game developers and designers, enabling them to showcase their creativity and actively participate in the governance of the blockchain.

Key Investors and Funding Raised :

Accelchain

Industry Vertical	No-code Platform
Founder(s)/CEO	Ram Shanmugam Shrikrishna Srinivasan
Date of Establishment	15-Jul-22
HQ	Bengaluru, Karnataka, India

Website
www.accelchain.xyz

LinkedIn
https://www.linkedin.com/company/accelchain/

Company Background and Business Model :

Accelchain delivers a no-code devops automation platform to rapidly develop, deliver and manage secure decentralized applications on any blockchain. It enables developers to easily develop, test, audit, deploy their Web3 dapps, covering the key aspects of the entire devops tool chain for the Web3 stack and support deployment on all chains.

Key Investors and Funding Raised :

Zyber 365

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Pearl Kapur Sunny Vaghela
Date of Establishment	2023
HQ	Ahmedabad, Gujarat, India

Website
https://www.zyber365.com/

LinkedIn
https://www.linkedin.com/company/zyber-365/

Company Background and Business Model :

Zyber365 provides a robust, decentralized, and cyber-secured operating system which adheres to the fundamental principles of environmental sustainability. By leveraging a range of bleeding-edge technologies including Blockchain, quantum safe computing, distributed ledger technology, and consensus mechanisms, its system safeguards user data, transactions, and interactions. It is also introducing a diverse and innovative range of multiple Web3 products like Layer-0, Layer-1 and Layer-2 blockchains, decentralised identities, data analytics, software development kit, web browser, NFT marketplace, which can be collectively leveraged as a complete Web3 ecosystem or as a standalone application specified by user requirement.

Key Investors and Funding Raised :

Series A US$ 100M

Airchains

Industry Vertical	Web3 Middleware SaaS
Founder(s)/CEO	Ankur Sinha
Date of Establishment	15-Aug-22
HQ	Gurugram, Haryana, India

Website
https://airchains.io

LinkedIn
https://www.linkedin.com/company/airchains/

Company Background and Business Model :

Airchains is a web3 middleware Saas product that allows users to deploy, build, and scale their blockchains. It is a one-stop solution that allows users to accomplish the deployment and management with ease. The Airchains ZK Stack provides a dynamic suite of tools with multiple execution layers like EVM, Cosmos & Solana Compatible chains. With integrated tools & APIs, their platform enables developers, enterprises, & institutions to build and run their own blockchain networks and build dApps & NFTs while enhancing network security, & performance.

Key Investors and Funding Raised :

Seed Latest Deal Amount: $12.2K

Kreatorverse

Industry Vertical	Web3 Low-code & No-code Toolset
Founder(s)/CEO	Yuvaraj Thanikachalam
Date of Establishment	2-Jan-24
HQ	Bengaluru, Karnataka, India

Website
www.kreatorverse.com

LinkedIn
https://www.linkedin.com/company/kreatorverse/

Company Background and Business Model :

Kreatorverse are engineers of Low-code & No-code toolsets for Web3 product owners, managers, designers, and Web3 entrepreneurs (Kreators) ecosystem. They assist startups and enterprises in adopting the right web3 strategy and evolving their Web3 (DeFi, DID, NFT, Crypto, DEX, DAO) ideas into market-testable secure & usable applications in a short timeline using their easy-to-use toolsets.

Key Investors and Funding Raised :

No External Equity funding raised

Xenon Labs

Industry Vertical	Multichain No-code Platform
Founder(s)/CEO	Sagar Pratap Joisar
Date of Establishment	2018
HQ	Mumbai, Maharashtra, India

Website
http://www.xenonlabs.io

LinkedIn
https://www.linkedin.com/company/xenonlabsio/

Company Background and Business Model :

It is a Multichain No-code Web 3 platform where one can create Web 3 Products in just 3 Steps within 3 Minutes.They are a team of passionate blockchain developers, Full Stack Developers, Product Managers, Graphic Designers, UX/UI Designers, and Marketing Experts helping NFT projects of every size from start to the very end and beyond. Xenon Labs is a platform that accelerates the growth of Web 3 based startups in a decentralized, safe and autonomous way. Their goal is to make the ecosystem simple, safe, and much more accessible to everyone

Key Investors and Funding Raised :

Spydra

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Manish Tewari, Ashwath Govindan
Date of Establishment	2021
HQ	Bengaluru, Karnataka, India

Website
https://www.spydra.app/

LinkedIn
https://www.linkedin.com/company/spydra/

Company Background and Business Model :

Spydra is building a next-generation API-driven Decentralization-as-a-Service platform to enable businesses and developers to leverage the full potential of Blockchain and the Decentralized Web Infrastructure.

Key Investors and Funding Raised :

Pre-seed funding of USD 3 million funded by Graviton Web3 Accelerator

Tezos India Foundation

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Om Malviya (President)
Date of Establishment	2019
HQ	Bengaluru, Karnataka, India

Website
https://tezosindia.org.in/

LinkedIn
https://www.linkedin.com/company/tezos-india-foundation/

Company Background and Business Model :

The Tezos India Foundation assists individuals and entities to use the Tezos blockchain. Their goal is to grow the community and advance Tezos in India through education, meetups, projects and partnerships. Tezos is an open-source blockchain that can execute peer-to-peer transactions and serve as a platform for deploying smart contracts. The native token for the Tezos blockchain is the tez. The Tezos network achieves consensus using proof-of-stake.

Key Investors and Funding Raised :

Alpyne Labs

Industry Vertical	On & Off Ramp Solutions
Founder(s)/CEO	Durgaprasad Mujumdar
Date of Establishment	21-Sep-22
HQ	Mumbai, Maharashtra, India

Website
https://alpyne.tech/

LinkedIn
https://www.linkedin.com/company/alpyne-labs

Company Background and Business Model :

Alpyne Labs provides user-friendly On-ramp and Off-ramp crypto solutions. As a B2B company, their product seamlessly integrates into the client's platform via an API. This integration enables users to buy crypto using INR directly on their platform in real time through local payment methods such as UPI. The company operates on a B2B2C business model, charging businesses a nominal fee for integration. Subsequently, the primary revenue streams include transaction fees for the provided gateway services and profits generated from the markup on assets sold by the company.

Key Investors and Funding Raised :

Onramp

Industry Vertical	On Ramp Solutions
Founder(s)/CEO	Chandan Kumar
Date of Establishment	2021
HQ	Bengaluru, Karnataka, India

Website
https://onramp.money/

LinkedIn
https://www.linkedin.com/company/onrampmoney/

Company Background and Business Model :

Onramp provides Fiat on-ramp solution for Web3 applications, aiming to to solve the issue of difficulty faced by the Web3 sector in onboarding the masses. It's main goal is to make Web3 onboarding simple, fast & affordable.

Key Investors and Funding Raised :

Andreessen Horowitz, Sequoia Capital, a16z

Persistence Labs

Industry Vertical	Blockchain infrastructure
Founder(s)/CEO	Tushar Aggarwal
Date of Establishment	2019
HQ	Singapore

Website
https://persistence.one/

LinkedIn
https://www.linkedin.com/company/persistenceone/

Company Background and Business Model :

Persistence is a Cosmos-based specialized Layer-1 blockchain powering an ecosystem of DeFi Applications focused on unlocking the liquidity of staked assets. The two main pillars of Persistence Labs are: The Persistence Core-1 Chain- The absolute core of the ecosystem, the blockchain powers all activity for users and allows developers to build innovative use cases to become part of the ecosystem AUDIT.one- The Research and Validator arm of Persistence Labs, securing multiple Proof-of-Stake networks, driving innovation and adoption of Proof-of-Stake and secure blockchain infrastructure.

Key Investors and Funding Raised :

Arrington XRP Capital, AU21 Capital, Woodstock fund, ZBS capital

Ava Labs

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Maofan Ted Yin (Founder) Devika Mittal (India Head)
Date of Establishment	2018
HQ	New York, USA

Website
https://www.avalabs.org/

LinkedIn
https://www.linkedin.com/company/avalabsofficial/

Company Background and Business Model :

AVA is a blockchain platform providing scalability, decentralization, security, and flexibility. The company was founded by Cornell computer scientists, who partnered with Wall Street veterans and early Web3 leaders to execute a promising vision for redefining the way people build and use open, permissionless networks. Ava Labs is redefining the way people create value with Web3.

Key Investors and Funding Raised :

$350M

Transak

Industry Vertical	Web3 Onboarding Infrastructure Provider
Founder(s)/CEO	Yeshu Agarwal
Date of Establishment	20-Oct-19
HQ	Miami, Florida, USA

Website
https://transak.com/

LinkedIn
https://www.linkedin.com/company/transak/

Company Background and Business Model :

Transak is a Web3 onboarding infrastructure provider. Its API-driven solutions enable Web3 platforms to onboard users from 150+ countries to crypto while abstracting the complexity of user KYC, risk monitoring & compliance, payment methods and customer support. Transak's on/off-ramp widget can be integrated into an app in just a few lines of code. Transak is a product of the Tachyon accelerator program and is backed by top VCs including Consensys and Animoca Brands. While the HQ is in Miami, its operational HQ is in Bengaluru in India.

Key Investors and Funding Raised :

Raised $20M. Key Investors: Consensys, Animoca Brands, KX VC (VC firm of KX Bank, Thailand), UOB VM (VC firm of United Overseas Bank, Singapore), SBI Ven Cap, CeIC

Marlin Protocol

Industry Vertical	Decentralized Blockchain Protocol
Founder(s)/CEO	Amol Agrawal, Josh Payne, Prateesh Goyal, Pratyaksh Sharma, Roshan Raghupathy, Siddhartha Dutta
Date of Establishment	2018
HQ	Singapore

Website
https://www.marlin.org/

LinkedIn
https://www.linkedin.com/company/marlinprotocol/

Company Background and Business Model :

Marlin is an open protocol tool that accelerates decentralized communications for DeFi and Web 3. It allows parties, such as miners, to connect to a decentralized network of relay nodes located around the world, allowing them to propagate blocks faster than they would otherwise be able to. The tool offers a one-of-a-kind medium for incentivizingfull nodes while also offering a better P2P networking alternative for blockchains and decentralized networks in general.

Key Investors and Funding Raised :

Supported by Arrington XRP Capital, Binance Labs, Continue Capital, DHVC, Electric Capital, Fenbushi etc.

Push

Industry Vertical	Web3 Communication Protocol
Founder(s)/CEO	Harsh Rajat
Date of Establishment	9-Mar-21
HQ	Global

Website
https://www.push.org

LinkedIn
https://www.linkedin.com/company/push-protocol/

Company Background and Business Model :

Push is the communication protocol of web3. Push protocol enables native notifications, messaging, spaces, video and more for wallets addresses through a secure, encrypted and open network for web3 protocols, dapps and crypto wallets. Push is powering communication for protocols like Shapeshift, Uniswap, Bankless, Coindesk, Arbitrum, Polygon, DyDx, etc and have been integrated with Push x Metamask snap, Unstoppable among others.

Key Investors and Funding Raised :

Jump, Tiger Global, A Capital, ParaFi, Balaji S, Sandeep N among other prominent VCs and Angels

Berachain

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Pseudonymous co-founders known as Homme Bera, Dev Bear, Papa Bear and Smokey the Bera Vish BR (India Head)
Date of Establishment	2021
HQ	Cayman Islands

Website
www.berachain.com

X
https://X.com/berachain

Company Background and Business Model :

Berachain is a high-performance EVM-compatible blockchain built on Proof-of-Liquidity consensus. Proof-of-Liquidity is a novel consensus mechanism that aims to align network incentives, creating strong synergy between Berachain validators and the ecosystem of projects.

Key Investors and Funding Raised :

Berachain is funded by 10 investors. dao5 and Shima Capital are the most recent investors. It raised a series A round on Apr 20, 2023 of $42 million at a valuation of $420.69 million

Biconomy

Industry Vertical	Web3 Developer & Transaction Infrastructure Platform
Founder(s)/CEO	Aniket Jindal, Ahmed Al-Balaghi, Sachin Tomar
Date of Establishment	2019
HQ	Singapore

Website
https://www.biconomy.io/

LinkedIn
https://www.linkedin.com/company/biconomy/

Company Background and Business Model :

Biconomy is a Web3 developer and transaction infrastructure platform that helps developers deliver effortless experiences to their end users. Blockchain interactions are still deeply complicated for a majority of users, and as pioneers of Account Abstraction (ERC-4337), Biconomy accelerates the mass adoption of Web3 through simple user journeys, achieved with a decentralised UX stack that gives developers powerful tools to remove UX complexities, onboard users, and scale their dApps. They launched a powerful and hyper-flexible SDK in 2022. This SDK lets developers easily plug, stack, and customise APIs and modules that offer massive benefits including one-click user journeys, transaction bundling, and control over gas fees. Integration with the SDK, which utilises a non-custodial, multi-chain and gas-efficient relayer infrastructure network, takes only minutes. Biconomy paves the way for simple user journeys that help non-crypto natives onboard Web3 ecosystems.

Key Investors and Funding Raised :

Raised a total of $22M in funding over 3 rounds

EigenLayer

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Sreeram Kannan
Date of Establishment	2021
HQ	Seattle, USA

Website
https://www.eigenlayer.xyz

LinkedIn
https://www.linkedin.com/company/eigenl/

Company Background and Business Model :

EigenLayer is a set of smart contracts on Ethereum that allows consensus layer Ether (ETH) stakers to opt in to validating new software modules built on top of the Ethereum ecosystem. Stakers opt in by granting the EigenLayer smart contracts the ability to impose additional slashing conditions on their staked ETH, allowing an extension of cryptoeconomic security. By opting into EigenLayer, stakers can validate for many types of modules including consensus protocols, data availability layers, virtual machines, keeper networks, oracle networks, bridges, threshold cryptography schemes, and trusted execution environments. Instead of fragmenting security between modules, EigenLayer aggregates ETH security across all of them. This increases the security of the decentralized applications (dApps) that rely on the modules.

Key Investors and Funding Raised :

Investors include Blockchain Capital, Polychain, Coinbase Ventures, Breyer Capital and more

Kana Labs

Industry Vertical	Cross-chain Middleware
Founder(s)/CEO	Karthik Subramaniam, Co-founder and CEO
Date of Establishment	2021
HQ	London, England, United Kingdom

Website
https://kanalabs.io/

LinkedIn
https://www.linkedin.com/company/kanalabs/

Company Background and Business Model :

KanaLabs is a cross-chain middleware that sits between the user/dapps on top and the complex blockchains at the bottom. They reduce the barriers of entry not just for users but also for developers and founders by providing access through their all-in-one SDK. Their tools allow users to lend, borrow, stake and find the best yield generating platform across the universe (EVM and non-EVM chains). Their swap functionality simply allows users to use any currency/token and access the best rates possible.

Key Investors and Funding Raised :

$2M

MOI Technology

Industry Vertical	L1 Blockchain Protocol
Founder(s)/CEO	Anantha Krishnan, Ganesh Kumble, Sai Prashanth Vuppula, Rahul Lenkala, Manish Meganathan
Date of Establishment	22-Apr-22
HQ	Delaware, USA

Website
https://moi.technology

LinkedIn
https://www.linkedin.com/company/moi-tech/

Company Background and Business Model :

A context-aware L1 blockchain protocol that is paving the way for the new era of interaction-centric computing by introducing participant as a fundamental new dimension into computation. - Each user gets their own personalized blockchain catered to their specific needs which makes it faster than a database, making it very flexible - Leverage dynamic shards and participant state channels for different purposes, from DeFi, gaming, storage, to Web3 computing in a single chain with dynamic participant preferences - Transact across millions of nodes with billions of transactions based on the users' digital footprint in a single flat-chain. Context, the new participant level super-state, will allow for a user to work across networks easily and seamlessly with the ability to safely transfer assets and values from one person to another person in any chain without the need for multitude of bridges.

Key Investors and Funding Raised :

Momentum 6, a top crypto fund based out of the Middle East, has backed the organisation with US$ 500,000.00 to develop the worldâ€™s first context-aware p2p network.

Router Protocol

Industry Vertical	Cross Chain Protocol
Founder(s)/CEO	Ramani Ramachandran, Shubham Singh, Chandan Choudhury, and Priyeshu Garg.
Date of Establishment	2021
HQ	Singapore

Website
www.routerprotocol.com

LinkedIn
https://www.linkedin.com/company/router-protocol/

Company Background and Business Model :

The Router Protocol serves as a cross-chain protocol. The use cases range from cross-chain NFTs, cross-chain governance, and cross-chain stablecoins to cross-chain oracles and cross-chain marketplaces. Router's CrossTalk library is an extensible cross-chain framework that enables seamless state transitions across multiple chains, supporting both stateful and stateless bridging.

Key Investors and Funding Raised :

Funding via Crunchbase Series A US$ 4.1M

Seracle

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Shrikant Bhalerao
Date of Establishment	20-Dec-18
HQ	Riyadh, Kingdom of Saudi Arabia

Website
www.seracle.com

LinkedIn
https://www.linkedin.com/company/seracle/

Company Background and Business Model :

Seracle operates blockchain nodes for both layer 1 and layer 2 in collaboration with trusted partners such as Oracle, Spheron, and NodeOps. On top of this robust foundation, they have implemented an integrated development environment (IDE) that empowers developers to work on blockchains using widely-used programming languages like Java, .NET, PHP, NodeJS, and more. This eliminates the necessity for developers to learn native blockchain programming languages, resulting in a remarkable 90% reduction in development costs. Their clientele includes industry giants like Oracle, Shemaroo, British Telecom, Thales, Chingari, as well as a thriving community of over 12,000 individual developers who have harnessed the power of their solution. Their primary competitor is Ankr.com, and they are partnered with Oracle the same way Ankr is partnered with Microsoft.

Key Investors and Funding Raised :

While they have been self-funded and have maintained a profitable operation, they are currently in the midst of a private token sale. The listing of their token is scheduled for April 2024 and NEAR is their blockchain partner.

Shardeum Foundation

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Nischal Shetty (President), Omar Syed (Foundation Council Member) & Markus Spillmann (Foundation Council Member)
Date of Establishment	14-Apr-22
HQ	Zug, Switzerland

Website
https://shardeum.org/

LinkedIn
https://www.linkedin.com/company/shardeum/

Company Background and Business Model :

Shardeum is an EVM compatible sharded blockchain with infinite scalability, true decentralization and solid security. Shardeum aims to be a chain capable of onboarding over a billion people to the blockchain and crypto revolution. Shardeum, like the Internet will be open, collaborative and community driven that would democratize accessibility to decentralization. Shardeum will be the infrastructure on which the next iteration of the Internet which is Web3 will be built on.

Key Investors and Funding Raised :

$25.9 MM raised from Seed and Strategic Round. Prominent investors include Struck Crypto, Jane Street, Amber Group, Arrington Capial and Foresight Ventures.

XDC Network

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Atul Khekade & Ritesh Khekade
Date of Establishment	18-Mar-17
HQ	Grand Cayman, Cayman Islands

Website
https://xinfin.org/

LinkedIn
https://www.linkedin.com/company/xdc-foundation/

Company Background and Business Model :

The XDC Network is a secure, scalable third-generation blockchain network with a capacity of up to 2000 transactions per second. It offers high-throughput and low-latency transactions. It is an enterprise grade layer 1 hybrid network with the aim to bring more efficiency and transparency particularly to the SME sector of Global trade Finance industry via digitisation. It is Decentralised Blockchain network run by a strong talented community members across the globe along with core team which is moving towards Decentralisation via it's DAO very soon.

Key Investors and Funding Raised :

Stackr Labs

Industry Vertical	Blockchain Infrastructure
Founder(s)/CEO	Kautuk Kundan
Date of Establishment	2022
HQ	Remote

Website
https://www.stackrlabs.xyz/

LinkedIn
https://www.linkedin.com/company/stackr-labs/

Company Background and Business Model :

Stackr Labs builds app-specific rollups on ethereum in web2 programming languages. Analogous to the "micro-services" architecture of web2, micro-rollups can be pieced together like legos to serve a bigger purpose (e.g. accounting module, NFT module, identity module). Stackr unlocks more flexible rollups and helps mplement deterministic state machines for logic in any programming language like Python or Javascript.

Key Investors and Funding Raised :

Raised USD 5.5 million in seed round with Archetype as the Lead Investor

Zeeve

Industry Vertical	Blockchain-Infrastructure-as-a-Service
Founder(s)/CEO	Dr. Ravi Chamria
Date of Establishment	2021
HQ	Irvine, California, USA

Website
http://www.zeeve.io/

LinkedIn
https://www.linkedin.com/company/0xzeeve/

Company Background and Business Model :

Zeeve is an ISO 27001, SOC2 Type II, and GDPR-compliant Blockchain-Infrastructure-as-a-Service and a Rollups-as-a-Service (RaaS) platform, operating across India, the US, Europe, and Dubai. As the leading provider of Rollups-as-a-Service, dedicated node infrastructure, and hosted subgraphs, Zeeve ensures 24x7 monitoring, Enterprise SLA, 99.9% uptime, and management dashboards for a secure and scalable web3 infrastructure.

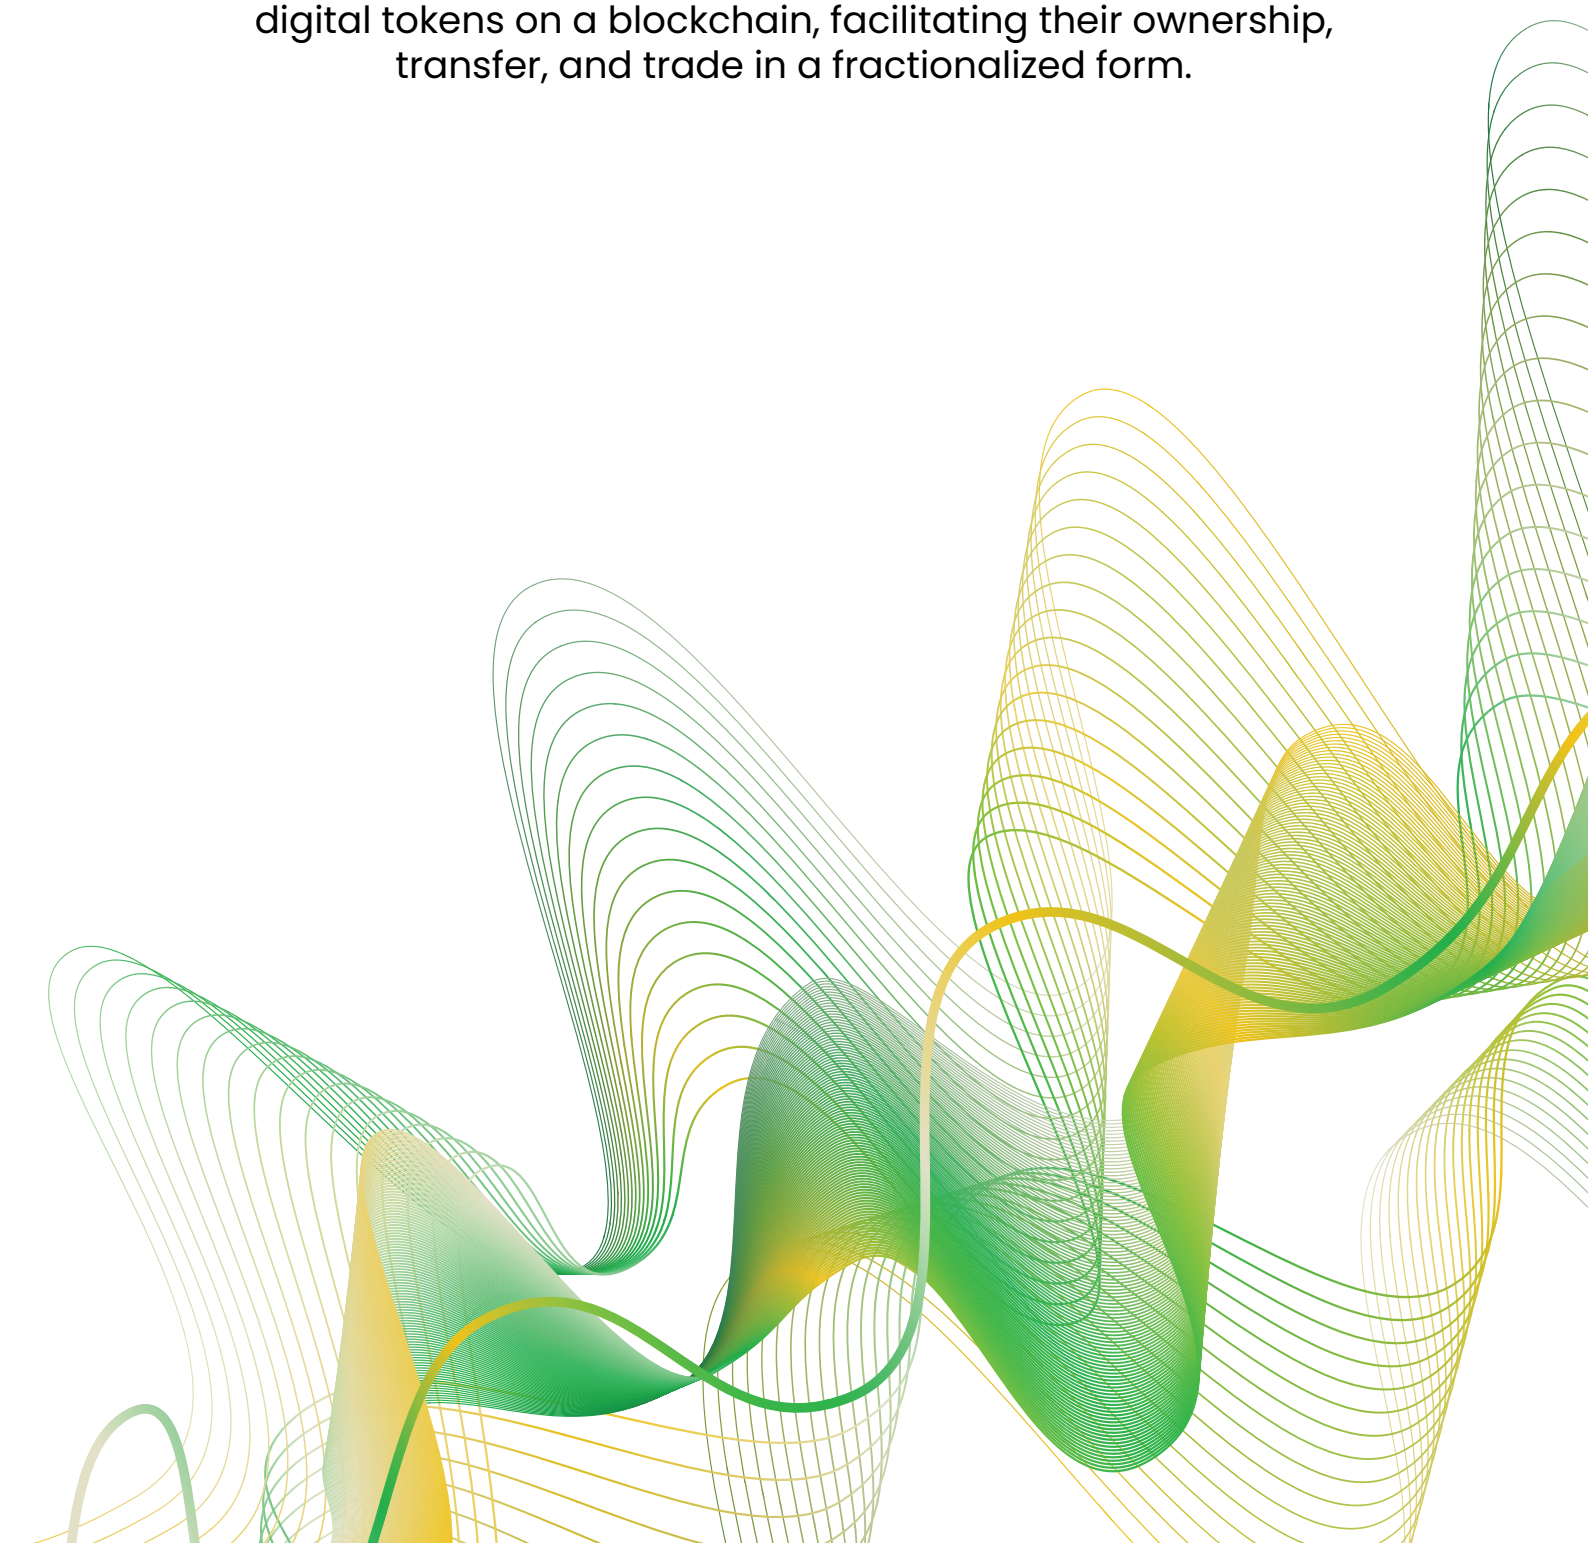
Key Investors and Funding Raised :

In June 2022, Zeeve secured a $2.65 Million Seed Round investment from Leo Capital and Blu Ventures. This influx empowered it to expand its tech brigade, advance product innovation, and amplify engagement with dApp developers, established enterprises, and emerging Web3 startups.

Total No of Companies : 12

Asset Tokenization

They are involved in the conversion of real-world assets into digital tokens on a blockchain, facilitating their ownership, transfer, and trade in a fractionalized form.



Terazo

Industry Vertical	Asset Tokenization (Real Estate, VC Fund, Unlisted Companies)
Founder(s)/CEO	Shaan Zaveri, Gaurav Gadhecha, Aniruddh Jhaveri
Date of Establishment	2021
HQ	Gandhinagar, Gujarat, India

Website
https://www.terazo.network/

LinkedIn
https://www.linkedin.com/company/terazo-network/

Company Background and Business Model :

Terazo is an asset tokenization platform for issuance, management and trading of tokenized securities on blockchain. It is India's first private market investment platform supporting end-to-end issuance and trading of security tokens through its regulated and transparent platform.

Terazo offers fractionalized investments in real estate, VC funds, and unlisted companies.

Terazo has launched India's first tokenized security offering regulated by IFSCA, India under the regulatory sandbox framework with a corpus of $7 million.

Key Investors and Funding Raised :

https://www.linkedin.com/company/finclus/

Company Background and Business Model :

Finclus is an agri-fintech start-up that is working towards solving the problem of financial inclusion for farmers in India. Finclus is partnering with governments, banks, the Reserve Bank of India, FPOs, think tanks, and the Ministry of Agriculture to provide farmers with a FINc ID, reducing the processing fees and turnaround time to a fraction. This will help farmers get loans in just 3 minutes at a 4% interest rate, with a 20% discount on Agri inputs delivered at their farm gate.

Brú Finance

Industry Vertical	Decentralized Finance
Founder(s)/CEO	Ashish Anand
Date of Establishment	02-Aug-22
HQ	Mumbai, Maharashtra, India

Website
https://bru.finance/

LinkedIn
https://www.linkedin.com/company/bru-finance/

Company Background and Business Model :

Brú Finance's innovative fractional bonds mechanism, backed by agri commodities, allows liquidity providers to subscribe to 6-month tenure bonds that generate superior yields with the security of highly liquid collaterals.
The proceeds of these bonds are used to provide short-term, duration-matched loans to participants in the commodity supply chain such as farmers/traders/processors. The Brú Finance DeFi platform enables users to conduct transactions on-chain, tokenize their assets, borrow money against tokenized assets, and create a secondary market for tokenized assets.
Brú Finance has innovated the tokenisation mechanism for commodities with the introduction of a first of its kind, custodian node that ensures verifiable tokenisation of pledged commodities stored in third-party asset custodian warehouses.

Polytope Networks

Industry Vertical	Investment/ VC / Incubators
Founder(s)/CEO	Shubham S Sapkal
Date of Establishment	2021
HQ	Pune, Maharashtra, India

Website
polytopenetworks.com

LinkedIn
https://in.linkedin.com/company/polytopenetworks

Company Background and Business Model :

Polytope Networks is a decentralised autonomous organisation (DAO) that seeks to introduce a new degree of openness and equity to venture capital investing. The Ethereum blockchain-based network enables anyone to invest in early-stage startups and acquire exposure to their potential growth. Rather than investing in individual companies, Polytope Network employs a novel "portfolio funds" model in which investors can pool their funds into a diversified portfolio of startups. The DAO and its community members collectively make investment decisions based on a consensus mechanism for the portfolio funds. By eliminating intermediaries and giving investors direct input on investment decisions, the network seeks to provide a more democratic and transparent approach to venture capital investing. Polytope Network also seeks to reduce startup funding entry barriers by allowing anyone, regardless of wealth or location, to invest in early-stage companies.

Key Investors and Funding Raised :

Polytope Network raised $1.8 million in a seed funding round in September 2021. The funding round was led by Polychain Capital, a well-known blockchain investment firm, and also included participation from other notable investors such as Alameda Research, CMS Holdings, and Coinfund.

https://www.linkedin.com/company/yodaplus/

Company Background and Business Model :

Yodaplus is a technology solutions company specializing in digital transformation across diverse sectors like FinTech, eCommerce, Blockchain, Capital Markets, Healthcare and Retail Logistics, among others. Yodaplus is committed to revolutionizing trade finance with their innovative documentation solution, compliant with the Model Law on Electronic Transferable Records (MLETR). This not only simplifies the complex process of trade documentation but also ensures that digital documents possess the same legal credibility as traditional paper documents. This results in a secure and efficient trade environment, enabling users to focus on what truly matters - business growth. Yodaplus also provides products for asset tokenization and DeFi lending pool.
